QUALIFICATIONS

SSI (Structural Steel Integration)

Constructed from special thick steel, the cabinet is welded into a single piece both inside and out. This design enhances the cabinet's overall strength, making it more resistant to open and harder to destroy.

XLarge Bolts

Oversized 38 mm bolts, numerous and rust-proofed, fortify the front, deterring break-ins, door damage, and resisting bolt cutting.

CS350 Barrier Material

Incorporating CS350, a specially developed, 110 mm thick fireproof material, it offers superior heat and penetration resistance, safeguarding valuables from fire.

Multi Protection Door

The 180 mm steel door, featuring fire-retardant and anti-drilling fill, includes 95 mm puncture-proof plates and robust hinges. With a front heat seal and fireproof backing, it offers all-around fire and theft protection, provides superior fire resistance 120 minutes at an average temperature of 1050 degrees.

S&G Combination Lock

S&G combination locks boast UL certification for global safety standards, a 4-digit code with a 1,000,000 possible combinations numbers, a theft-detering ring, and a lock that resists decryption.

8 Lever Key Lock

8-lever key lock, Double Bit Lock type. The key is crafted from a special metal that is strong, durable, and difficult to counterfeit.

Automatic Relock System for Conqueror

The integrated auto-lock system, shielded by safety glass, safeguards codes and keys. It triggers instantly under attack, securing the cabinet against unauthorized access.

Drill Protection Alloy Steel

Strengthened with a puncture-proof steel plate made from a specially developed alloy. It protects the key code mechanism Keys and all points.

High Quality Paint

The cabinet undergoes careful polishing and rust-proofing, with paint meticulously spray-dried in a car oven for a durable, uniform, and glossy finish.
